

## Transition pieces, galvanised

Technical catalogue: Galvanised  
 Section: 01  
 Page: 16/16  
 Revised: 01.05.2009

Diameter:  $\varnothing 80 - \varnothing 1000$  mm.

Transition pieces are spot welded and made of 0.90 mm galvanised sheet metal.

Transition pieces can be made to order in other dimensions, and can be made asymmetrical.

State dimensions for BU  $\times$  LU and D plus assembly method when ordering (p. 6).

### Calculating H:

$$H = 240 + 0,5 \times (\text{max. value of LU} - D) \text{ or } (BU - D)$$

### Example

$$D = 350, LU = 400, BU = 600, EXL = 200, EXB = 300$$

$$H = 240 + (0,5 \times 250) = 240 + 125$$

$$H = 365 \text{ mm}$$
